Econometric Theory II (Part 2)

Syllabus: Version 2 (April 12, 2023)

Instructor:	Mikkel Plagborg-Moller, mikkelpm@princeton.edu
Lectures:	Tue/Thu 11.00-12.30, JRR 198
Office hours:	Thu 1.35-2.30 pm, JRR 282
Preceptor:	Luther Yap, lyap@princeton.edu
Website:	`https://princeton.instructure.com/courses/9818`

Material.   The course material is self-contained and there is no required textbook. Handouts covering most of the material will be available on the website. The handouts borrow heavily from material generously shared by Professor Alberto Abadie, although any errors are the sole responsibility of the instructor. Some students might find it useful to have a textbook as an additional reference. Good reference books include:

Cameron, A. C. and Trivedi, P. K. (2005), *Microeconometrics: Methods and Applications*, Cambridge University Press.

Hansen, B. (2022), *Econometrics*, Princeton University Press.

Hayashi, F. (2000), *Econometrics*, Princeton University Press.

Wooldridge, J. M. (2010), *Econometric Analysis of Cross Section and Panel Data*, 2nd edition, MIT Press.

This syllabus also lists additional readings that provide a deeper understanding of the material.

Homework.   Problem sets will be posted on the course website every one or two weeks. The due date will typically be one week after the assignment is posted. Answers must be submitted in paper form. *Late assignments will not be accepted.* You may form groups of at most 3 students and turn in one answer for the entire group. Moreover, you may discuss

the exercises with any of your classmates. Problem sets will be graded coarsely; however, we reserve the right to subtract points for sloppy exposition, including unreadable code or poor document structure. If you find a grading error, please resubmit your problem set along with a one-paragraph explanation; we reserve the right to re-grade the entire problem set.

Exams. There will be a 90-minute, in-person, open-book final exam. No collaboration is allowed on the final.

Grading. Your final course grade will be the average of your grade in parts 1 and 2. The grade for part 2 will be a monotonic function of the weighted average of (i) the average problem set score (20% weight) and (ii) the final exam score (80% weight).

Code of conduct. All course activities, including class meetings and homework assignments, are subject to the university's academic code and code of conduct as detailed in the "Rights, Rules, Responsibilities" publication.

Accommodations for students with disabilities. Students must register with the Office of Disability Services (ODS) (ods@princeton.edu; 258-8840) for disability verification and determination of eligibility for reasonable academic accommodations. Requests for academic accommodations for this course need to be made at the beginning of the semester, or as soon as possible for newly approved students, and again at least two weeks in advance of any needed accommodations in order to make arrangements to implement the accommodations. Please make an appointment to meet with the instructor in order to maintain confidentiality in addressing your needs. No accommodations will be given without authorization from ODS, or without advance notice.

Important dates. Changes will be announced via course email.

Mar 21 (Tue): First class with M. Plagborg-Moller

Apr 27 (Thu): Last class

May 10 (Wed): Final exam

Outline for Plagborg-Moller's part of the course. The following outline is preliminary and may change without warning.

1. Bootstrap

2. Nonparametric methods

   (a) Nonparametric density estimation

   (b) Nonparametric regression

3. Extremum estimators

   (a) Nonlinear generalized methods of moments, maximum likelihood

   (b) Minimum distance

   (c) Testing

   (d) Weak identification

4. Discrete choice

   (a) Binary choice

   (b) Multinomial choice

5. Estimation of treatment effects

   (a) Counterfactuals, potential outcomes

   (b) Randomized experiments

   (c) Selection on observables, matching, inverse probability weighting

   (d) Instrumental variables, local average treatment effects

   (e) Differences-in-differences

   (f) Regression discontinuity

6. Quantile regression

Optional reading list

Where available, introductory readings are listed first and marked with a star (*). Original contributions are not always cited when good handbook/textbook references are available. The reading list is preliminary and may change without warning.

1   Bootstrap

* Cameron and Trivedi: Chapter 11.

Hansen: Chapter 10.

Efron, B. and Tibshirani, R. J. (1993), An Introduction to the Bootstrap. Chapman and Hall. Chapters 6 and 12–13.

Horowitz, J. L. (2001), "The Bootstrap," in *Handbook of Econometrics Vol. 5*, ed. by Heckman, J. J. and Leamer, E. E. Elsevier. Sections 1–3.

van der Vaart, A. W. (1998), Asymptotic Statistics. Cambridge University Press. Chapter 23.

2   Nonparametric methods

* Cameron and Trivedi: Chapter 9.

Hansen: Chapters 19–20.

DiNardo, J. and Tobias, J. L. (2001), "Nonparametric Density and Regression Estimation," *Journal of Economic Perspectives*, vol. 15, 11–28.

Green, P. J. and Silverman, B. W. (1993), Nonparametric Regression and Generalized Linear Models: A roughness penalty approach. CRC Press.

Ichimura, H. and Todd, P. E. (2007), "Implementing Nonparametric and Semiparametric Estimators," in *Handbook of Econometrics Vol. 6B*, ed. by Heckman, J. J. and Leamer, E. E. Elsevier. Sections 1–6.

Newey, W. K. (1990), "Semiparametric efficiency bounds," *Journal of Applied Econometrics*, vol. 5(2), 99–135.

Wasserman, L. (2006), All of Nonparametric Statistics. Springer. Chapters 4–6.

3   Extremum estimators

* Hayashi: Chapter 7.

  Cameron and Trivedi: Chapters 5–6 and 10.

  Hansen: Chapters 13 and 22.

  Andrews, I., Stock, J. H., and Sun, L. (2019), "Weak Instruments in IV Regression: Theory and Practice," *Annual Review of Economics*, vol. 11, 727–753.

  Newey, W. K., and McFadden, D. (1994), "Large Sample Estimation and Hypothesis Testing," in *Handbook of Econometrics Vol. 4*, ed. by Engle, R. F. and McFadden, D. L. Elsevier. Sections 1–6 and 9.

4   Discrete choice

* Cameron and Trivedi: Chapters 14–15.

* Hayashi: Chapter 8.1.

  Hansen: Chapters 25–26.

  Wooldridge: Chapters 15–16.

  Train, K. E. (2009), Discrete Choice Methods with Simulation, 2nd edition. Cambridge University Press. Chapters 1–6. Available online at:
  `http://elsa.berkeley.edu/books/choice2.html`

5   Estimation of treatment effects

The following four readings are overviews of the material that we will cover in this section.

* Abadie, A. and Cattaneo, M. D. (2018), "Econometric Methods for Program Evaluation," *Annual Review of Economics*, vol. 10, 465–503.

  Angrist, J. D. and Pischke, J. S. (2009), Mostly Harmless Econometrics: An Empiricist's Companion. Princeton University Press.

  Imbens, G. W. and Rubin, D. B. (2015), Causal Inference for Statistics, Social, and Biomedical Sciences: An Introduction. Cambridge University Press.

Imbens, G. W. and Wooldridge, J. M. (2009), "Recent Developments in the Econometrics of Program Evaluation," *Journal of Economic Literature*, vol. 47(1), 5–86.

For a thorough discussion with many opposing viewpoints on causal empirical methodology, see the symposium "Con Out of Econometrics" in the *Journal of Economic Perspectives*, 2010, vol. 24(2), pages 3–94. Available online at: `https://www.aeaweb.org/issues/126`

Randomized experiments

Abadie, A., Athey, S., Imbens, G. W., and Wooldridge, J. M. (2020), "Sampling-Based versus Design-Based Uncertainty in Regression Analysis," *Econometrica*, vol. 88(1), 265–296.

Duflo, E., Glennerster, R., and Kremer, M. (2008), "Using Randomization in Development Economics Research: A Toolkit," in *Handbook of Development Economics Vol. 4*, ed. by Schultz, T. P. and Strauss, J. A. Elsevier.

Selection on observables, matching, inverse probability weighting

* Imbens, G. W. (2004), "Nonparametric Estimation of Average Treatment Effects under Exogeneity: A Review," *Review of Economics and Statistics*, vol. 86(1), 4–29.

Abadie, A. and Imbens, G. W. (2006), "Large Sample Properties of Matching Estimators for Average Treatment Effects," *Econometrica*, vol. 74, 235–267.

Abadie, A. and Imbens, G. W. (2008), "On the Failure of the Bootstrap for Matching Estimators," *Econometrica*, vol. 76, 1537–1557.

Dehejia, R. H. and Wahba, S. (1999), "Causal Effects in Non-Experimental Studies: Re-Evaluating the Evaluation of Training Programs," *Journal of the American Statistical Association*, vol. 94, 1053–1062.

Heckman, J. J., Ichimura, H., and Todd, P. E. (1997), "Matching as an Econometric Evaluation Estimator: Evidence from Evaluating a Job Training Programme," *Review of Economic Studies*, vol. 64, 605–654.

Instrumental variables, local average treatment effects

* Angrist, J. D., Imbens, G. W., and Rubin, D. B. (1996), "Identification of Causal Effects Using Instrumental Variables," *Journal of the American Statistical Association*, vol. 91, 444–472.

  Abadie, A. (2003), "Semiparametric Instrumental Variable Estimation of Treatment Response Models," *Journal of Econometrics*, vol. 113, 231–263.

  Heckman, J. J. and Vytlacil, E. J. (1999), "Local instrumental variables and latent variable models for identifying and bounding treatment effects," *Proceedings of the National Academy of Sciences*, vol. 96(8), 4730–4734.

  Imbens, G. W and Angrist, J. D. (1994), "Identification and Estimation of Local Average Treatment Effects," *Econometrica*, vol. 62, 467–475.

Differences-in-differences

  Hansen: Chapter 18.

  Abadie, A. and Gardeazabal, J. (2003), "The Economic Costs of Conflict: A Case Study of the Basque Country," *American Economic Review*, vol. 93(1), 113–132.

  Athey, S. and Imbens, G. W. (2006), "Identification and Inference in Nonlinear Difference-in-Differences Models," *Econometrica*, vol. 74, 431–497.

  Card, D. (1990), "The Impact of the Mariel Boatlift on the Miami Labor Market," *Industrial and Labor Relations Review*, vol. 44, 245–257.

  Card, D. and Krueger, A. B. (1994), "Minimum Wages and Employment: A Case Study of the Fast-Food Industry in New Jersey and Pennsylvania," *American Economic Review*, vol. 84, 772–793.

  de Chaisemartin, C. and D'Haultfœuille, X. (2022), "Two-Way Fixed Effects and Differences-in-Differences with Heterogeneous Treatment Effects: A Survey," *Econometrics Journal*, forthcoming.

Regression discontinuity

* Lee, D. S., and Lemieux, T. (2010), "Regression Discontinuity Designs in Economics," *Journal of Economic Literature*, vol. 48, 281–355.

Hansen: Chapter 21.

Armstrong, T. and Kolesár, M. (2020), "Simple and Honest Confidence Intervals in Nonparametric Regression," *Quantitative Economics*, vol. 11(1), 1–39. Section 3.

Calonico, S., Cattaneo, M. D., and Titiunik, R. (2014), "Robust Nonparametric Confidence Intervals for Regression Discontinuity Designs," *Econometrica*, vol. 86(2), 2295–2326.

Hahn, J., Todd, P., and Van der Klaauw, W. (2001), "Identification and Estimation of Treatment Effects with a Regression-Discontinuity Design," *Econometrica*, vol. 69(1), 201–209.
